What is Evidence Based Policing?

PlateRanger-Agent

How to Find Vehicle Intelligence from Surveillance Footage

In recent years, law enforcement agencies have faced a critical shift in expectations, moving from reactive response models to more strategic, data-informed practices known as evidence-based policing (EBP). ResourceRouter addresses these challenges by automating data-driven patrol plans that put officers in the right place, at the right time, for the right amount of time.

Read More

In many investigations, the key to solving a case is hidden in plain sight—parked at the curb, turning out of frame, or simply passing by. Surveillance footage has become a critical tool in modern policing, but investigators risk missing actionable leads without the ability to extract and identify vehicle data from that footage. That's where tools like PlateRanger™ Agent come in.

Our Webinar

"CrimeTracer's ability to connect us and allow us to share information from police agency to police agency, not just at a local or statewide but almost a nationwide database, is phenomenal…I would rate CrimeTracer as one of the top databases that our department currently uses."

Detective Corporal Brandon Smith
Pacifica Police Department
